Rural Organizativo for Social Educación (ROSE)

ANNUAL REPORT – 2021 - 22

Introduction:

Rural Organization for Social Education has entered its remarkable 29th year of its registration and in the target villages of its operation. It has this responsibility to prepare the Annual report for this year 2021-22 along with the co-operation of the target groups like Women, Men and children in the grass roots of our society and funding agencies, supporting organizations and ROSE staff team. Our focus is on gender issues in relation to areas like **agriculture, health, food security, livelihoods, and environment**, together with emphasis on internalizing the gender dimension in all areas of work.

I. WOMEN EMPOWERMENT:

1. Formation of Women Groups

Since the inception of the organization ROSE is committed for women empowerment with specific focus on rural farm sector women. ROSE is working to empower women for better gender equality and to gain better quality of life with improved economic, health and social wellbeing through training, awareness programmes and economic support. ROSE, enabled the women to form their Self Help Groups (SHGs) and have common activities collectively. Our focus is on gender issues in relation to areas like agriculture, health, food security, livelihoods, and environment, together with emphasis on internalizing the gender dimension in all areas of work. ROSE has facilitated the formation of 150 SHGs that are brought under two geographical units: rural and coastal. The rural women are almost small and marginal farmers and landless while the coastal women are mainly poor fishing communities.

However, these women groups are not exclusively formed for micro-credit and savings as many NGOs are doing. ROSE till date emphasizes that women groups need to equip themselves in farming sector. Once they are capable of influencing the farming sector in a positive way, they could succeed in any development process including micro-credit. With this vision ROSE works with women farmers in the rural belt promoting an alternative farming system that could challenge drought, unfavorable market, and natural resource degradation.

ROSE accords importance to leadership building, gender equity, future sustainability, and Social and Environmental education. ROSE has so far formed **153 Women SHGs with a membership of 2256 women, 20 farmers clubs and 21 Children's Eco Clubs, 11 Adolescent Girls Groups and 5 Disaster Task Force Groups.**

Eliminating hunger, starvation and frustration caused due to lock down to prevent COVID 19

With the generous contribution of Godrej foundation and Swasti organization, ROSE extended in-kind support in the form of provisions kit to the 125 families. ROSE procured provisions kits including nutritional supplements and supplied the same to the starving people. Besides, handbills.

Coverage

The relief measures were distributed to the targeted people most affected by COVID 19 in Arimalam, Pudukkottai Block of Pudukkottai District. The relief package was distributed to the households selected based on the vulnerability criteria.

Supply of Oxygen Concentrate and sanitary Kit to Health Care Centres - PHCs :

Oxygen Concentrate for 5 Primary Health Care Centres in Arimalam blocks were provided. Each pack consists of Oxygen concentrate, surgical masks and hand sanitizers.

S.No	Name of the PHCs	No of oxygen concentrate
01	Kadiyapatti Primary Health Centre	1
02	Rayavaram Primary Health Centre	1
03	Arimalam Primary Health Centre	1
04	Keelanilai Primary Health Centre	1
05	Yembal Primary Health Centre	1
	Total	5

Covid 19 vaccine awareness:

Introduction:

India and the world continue to confront the COVID-19 pandemic since December 2019. Due to poor knowledge between populations about types of vaccine, its dosing recommendations, and the poor commitment to hygiene practices, the national and international health organizations are organizing campaigns to increase the public awareness level about the COVID-19 vaccines.

Vaccine confidence is the belief that vaccines work, are safe, and are part of a trustworthy medical system. Without some level of confidence, people will not move toward receiving a vaccine for themselves or their children.

It is in this context, ROSE partnered with Swasti– Bangalore, Godrej and Covid Action Collab (CAC) in generating awareness of vaccine uptake among the rural people who were hesitant to go for it. Misinformation was plenty in social media. Hence, thousands of people abstained from taking up vaccine. Another reason is accessibility to vaccine. Hence ROSE generated awareness of the importance and urgency of Vaccination against the pandemic COVID 19.

Following Strategies were employed:

- Organizing special Vaccination Camps in remote villages with the help of the PHC and health department.
- Verification of records of vaccination with the health department for identification of people who have not availed vaccines
- Home visit to convince the people to go for vaccination
- One to one interaction with those who had not availed vaccination
- Sharing of WhatsApp messages on the importance of vaccination
- Sharing by people who had vaccines, etc.
- Announcement over loud speakers in areas where there was low rate of vaccine-up take.

RESULT OF OUR INTERVENTIONS:

We have achieved more than the target of up-take of vaccine by individuals. It was targeted to reach 5000 individuals with vaccines. But, we have so far instrumental to the up-take of vaccines by 5185 individuals. Following are the detailed list of individuals who had been vaccinated:

1. Gender wise Achievement Details:

Type of Dose	Male	Female	Transgender	Total
Dose 1	875	652	0	1527
Dose 2	1795	1863	0	3658
Total	2670	2515	0	5185

2. Age wise vaccinated people:

Age	No. of people vaccinated
Upto 20	1034
Age 21 - 30	1238
Age 31 - 40	948
Age 41 - 50	799
Age 51 - 60	651
Age 61 - 70	342
Age 71 - 80	140
Age 81 - 90	29
Age 90 - 100	3
Age 101 - 110	1
Total	5185

While the majority of Indians would accept the vaccine, given the large population of India, even a small proportion of hesitant individuals would translate to millions of unvaccinated individuals. Strategic measures and policy decisions to enhance the rate of COVID-19 vaccination should be continuously planned and implemented in India. ROSE has already committed to continue promoting the vaccination in our district of Pudukottai.

We thank SWASTI – Bangalore, Godrej and Covid Action Collab (CAC) for its financial aid in the form of sub-grant which helped us ensure vaccination of 5185 adults in the district with in a span of three months. The vaccination awareness and the result prevented the rate of infection of COVID 19 pandemic.

CASE STUDIES

"I was not convinced of taking Vaccination against COVID 19 and worked in a Hotel as a server with the fear of getting infected any time" Mr. BALU

Case Study - I

Balu was a 48 years old man from Rasapatti, Pudukkottai district. He belonged to a middle-class family. There were 4 members in his family. His wife takes care of the house. He had two daughters and the need of the family was high so he went to Hosur in search of work. He joined the Hotel in Hosur as a Parotta Master. He was the only person in the family who provided income. His income was not enough for the family and he was unable to send his daughters to school beyond eighth grade. Unable to go to work due to lockdown during Corona period, he had no income at home due to lack of work and was thus struggled run the home or meet out the household expenses.

Unable to go to a permanent job, he was engaged in daily wage work and managed to meet out the household needs. Once the lockdown was relaxed, he went back to work in Hosur. Balu's income was a big support to cover family expenses. Aadhar Card was not in his hand, so Balu asked his owner to give leave for taking 1st dose of corona vaccine. As there was no other parotta master in the hotel, his owner did not give leave. His owner said that many problems would arise in the body if the corona vaccine was given. He also said that if he was vaccinated, his hand would become swollen and he could not work for a week. If there was no income for a week, the family would encounter financial crisis and so he did not get vaccinated.

Since lot of customers went to the hotel where he was working, Balu had a fear that Corona would infect him. There was also the fear of losing 1 week of work if vaccinated. In that situation, he came home asking for a day-off for his relative wedding. It was in this context that the ROSE team raised awareness about the need for the corona vaccine in his village. Mr. Balu shared with a staff about his situation. ROSE staffs convinced him of the importance of vaccination and the advantages of it. However, he was not convinced. But, the staffs informed him that there was no need for one week rest and one day rest would be sufficient. They also arranged discussion with two other workers like him and they too shared how they responded to vaccine. Then ROSE Team took him to Rasapatti where a special camp for vaccine was organized by the health department. Then he got his first dose of the vaccine on 05.02.2022. On the first day, he had a fever and he took the tablet given by the doctor. The next day morning his physical condition was alright. The next day he went to work as usual. He started working without any fear of getting infected. He also told others who worked with him to get vaccinated against corona virus.

Improving the lives rural adolescent girls

The project aims to promote decent working conditions of women and adolescent girls, working in the textile industry, South India. Further, provide the opportunity for collective action to advocate with spinning mills and trade associations, to ensure safe working conditions for female works. The other activities include training on legal rights awareness, skill development, and Life skill, assistance to access free legal aid and government support schemes and supplementary education activities for children. The project takes a holistic approach, with the inclusiveness of Gender and Child rights.

Approximately 300,000 girls from marginalized communities in Tamil Nadu work in the garment industry, the Sumangali system or its modified version. Many of these workers suffer from poor working and living conditions. Mostly trapped by contracts, requiring them to work for three to five years and this recruitment and working conditions are illegal. The project works with vulnerable women and adolescent girls, ROSE Trust implements programs in 32 villages in Arimalam Block Pudukkottai district.

Many of these workers suffer from poor working and living conditions. Mostly trapped by contracts, requiring them to work for three to five years and these recruitment and working conditions are illegal.

The empowerment of girls and young women in the project region is strengthened so that they can find freely chosen, better-paid work under safe working conditions. 26 girls are undergone tailoring at Regional Resource Centre (RRC), Arimalam

Data collection and studies:

Study on labour market, qualification and micro-enterprises: Orientation for staff team and selected beneficiaries about Labour Market study by Prof. Manimegalai. Survey questionnaire was prepared by Prof. Manimegalai and CARE T team in local vernacular.

Completed labour market study survey with selected 100 beneficiaries with the help of volunteers in Arimalam block of Pudukkottai District.

From the surveyed 100 girls, 64 girls are interested in collective business and remaining are interested in doing business individually. Organic Inputs Preparation, Vegetable production, Value addition / Health Mix preparation, Garments, Tailoring unit, Restaurant, Sanitary Napkin, Mushroom Production and Animal Husbandry are some of the selected business activity by the beneficiaries.

The other important livelihood activity chosen by the young girls is Nursery Raising. The Arimalam Block is famous in South India for nursery raising. It is carried out by many. The climate including water and soil quality in this area is suitable to nursery raising. It is planned to **start a Nursery Produces company** for the sustainable livelihood of rural young women.

During the data collection, we have organized village-level meetings following COVID 19 safety measures and collected the collective business opportunity, local available resources for doing the business and others.

Rehabilitation

- ✦ **Life Skill Education:** Adolescents were allowed to develop life skills through 10 training sessions at village and Block levels, which helped them to develop confidence and improve career skills. 394 girls participated and learned the following skills.
- ✦ Problem-solving, decision-making, creative thinking, critical thinking, self-awareness, empathy, Sympathy, relationships management, managing stress and emotions etc.,
- ✦ Life skills training served as motivation programme for pursuing formal education and vocational courses.
- ✦ The participants were able to cultivate not only confidence but also build relationship with family members, personal character, personality development etc.

Human Resource Development Training:

Human Resource Development Training programme was organized thrice during the reporting period. The trainings were facilitated by Prof. Venkatesh from Trichy, Mr. Prithviraj from CARE T Coimbatore, Mrs. Ahila, Vijaya and Kasthuri from ROSE Team. Following were the core theme of the training:

Self-Awareness, Empathy, Motivation, Communication Skills, Creative Thinking & Problem solving skills, Higher Education, Interview Skills, Work Ethics, Stress Management and Team work & Leadership skills.

Various methodology including storytelling, group activity, group discussion, mono act, demo and others was employed. Totally 180 girls and 3 staff members participated in the training programs.

As an outcome of the training, the girls were able to identify their field of interest, personal skills, and creativity and determined to enhance them further.

The potential dropout girls changed their minds and pursued formal education. 22 Girls started pursuing higher education (graduation). 17 Girls about to be dropped out continued their schooling.

More than a dozen girls shared that they were able to overcome acute family crisis that arouse due to break-down of families, drug addiction, extra marital affairs of parents, desertification by male spouse, extreme poverty due to large family size etc.

Gender Education Training:

Gender Education training was held at Arimalam where 6 batches of girls took part in the training. Totally, 260 girls participated in the trainings.

The trainings on gender education enabled the girls to become more articulate, assure their parents of protecting the family and achieve significantly.

Girls themselves were able to stop 7 child marriages.

A few girls refused to yield to their parents' pressure to marry at the early age.

The Training was facilitated by ROSE staff team members, Ms. Ahila Bharathi, Mrs. Vijaya and Mrs. Kasthuri.

Educational support:

85 Girls were extended educational support during the project period. Beneficiaries are selected from among the young girls first identified in the baseline study and also who participated in the Life skill training and Human Resource Development Training.

- Nursing (16),
- Graduation (5),
- Computer (17),
- Beautician (12),
